

**YOU'RE NOT A MEDICAL
STUDENT YET.
BUT YOU CAN START THINKING
LIKE ONE.**

MED _ DECODE

THIS IS YOUR FIRST STEP.

Do you want to see science applied to real people's problems?

Would you rather think, understand, and take action than simply memorise?

Do you believe there are no good answers without good questions?

Then this programme is for you!

NOVA MEDICAL
SCHOOL
Junior Academy

25 weeks · 5 levels · 1 new case = 1 online session per week

*Every week is a new cycle.
The case evolves. So do you.*

1

1. Receive the case by email

An anatomical description.
An ethical dilemma.
A new discovery. A teenager who faints while running. A medical test waiting to be interpreted.

2

2. Observe and think

Nothing to memorise.
You analyse the information, look for clues, formulate hypotheses, and decide which questions need to be asked.

3

3. 50-minute online session

The following day, you discuss the case with your group and an NMS tutor. Together, you share your reasoning, explore different approaches, and work towards the solution.

4

4. Level completed! Next challenge

Every five cases, you complete one level and move on to new medical topics and increasingly complex clinical reasoning.

What will you gain?

- Develop clinical reasoning skills before entering medical school.
- Learn alongside NMS professionals and medical students.
- Join a community of young people who share your passion for medicine.
- Receive an NMS Junior Academy Certificate.

Schedule: online sessions

Monday to Friday: 5:00 pm – 8:00 pm & Saturday mornings

Available in Portuguese and English.

€350/year
